EDUCATION

Carnegie Mellon University

Master of Software Engineering | GPA: 3.98/4.0

Pittsburgh, PA

Aug 2025 – Dec 2026

University of Michigan - Ann Arbor

Bachelor of Science in Computer Science | GPA: 3.7/4.0

Ann Arbor, MI

Aug 2018 – May 2022

WORK EXPERIENCE

Amazon

Software Development Engineer Intern

Seattle, WA

Jun 2026 - Aug 2026

- **Implemented Amazon Aurora DSQL's Change-Data-Capture Service to S3** using distributed, fault-tolerant, and transaction-ordered streams with zero data loss. Reducing customer ETL pipeline costs by 40-60%.
- **Designed DSQL's point-in-time snapshot capability** for logical replication and data export from any Amazon DSQL cluster. Enabled distributed snapshot processing, durable checkpointing, and catch-up mechanisms to improve stream latency, performance, and availability.

Forward

Software Engineer

San Francisco, CA

Jul 2022 – Mar 2024

- **Led end-to-end development of Forward's clinical compliance platform**, reclaiming 1,900 churned users and restoring \$200,000 in monthly revenue.
- **Launched Forward's** autonomous mini-clinic ([CarePod](#)). Drove data modeling for core Golang/gRPC clinical services based on FHIR HL7, accelerating feature development velocity by 12x.
- Enabled GraphQL integrations, diagnostic queries, and automated lab orders via AWS EventBridge/SQS using distributed, asynchronous, and event driven architecture.
- **Implemented intelligent routing and alert systems for urgent clinical tasks**, reducing triage time by ~10 mins, completion time by 90%, and acknowledgement latency by 99%.

Wise

Software Engineer Intern

Budapest, Hungary

Jun 2021 – Sep 2021

- **Developed an article recommendation engine** in [Wise's Help Center](#). Conducted A/B testing on 196,000 users. Increased article viewership by 10% and decreased customer ticket volume by 5%.

PROJECTS

Experts AI

Founding Engineer

Pittsburgh, PA

May 2025 – Dec 2025

- Backed by Carnegie Mellon University Swartz Center and placed top 10% in Y-Combinator Summer/Fall 2025. Architected an AI-driven legal inquiry platform from 0 to 1 using NodeJs, Vercel and Supabase.
- Implemented an Agent to optimize legal workflows using prompt chaining, reduced LLM hallucination with web crawling, Retrieval-Augmented Generation and embeddings.

SKILLS

- **Programming Languages:** Rust, C++, Golang, Java, Python, JavaScript/TypeScript
- **Libraries/Frameworks:** Tokio, gRPC, React, Next.js, Redux, NodeJs, GraphQL, Spring
- **Technologies:** AWS, Git, Docker, Kubernetes, SQL/NoSQL, Databases, Kafka, Grafana, Elasticsearch
